

SAIKAT DAS

Architecture Portfolio

ABOUT ME

Civil Engineering graduate from NIT Agartala with a growing passion for architecture, 3D visualization, and design. Skilled in AutoCAD, SketchUp, Lumion, and STAAD.Pro, with experience in architectural planning, 3D modeling, rendering, and construction documentation. Through academic projects and industry internships, I have developed a strong foundation in design, estimation, structural concepts, and project execution. I am enthusiastic about creating functional and visually compelling spaces while continuously expanding my expertise in architecture and visualization.

Seeking opportunities to contribute creativity and technical knowledge to architecture and design projects.

RESIDENTIAL PROJECT(G+1)

Property Details

- Client: Mrs. Snigdha Debnath
- Location: Barjala, Jirania, Tripura West
- Type: G+1 Residential Building
- Area: 280.76 sq.m.

Project Overview

A G+1 residential building designed to provide comfortable and functional living spaces for a modern family. The project includes site planning, architectural floor plans, septic tank detailing, and construction documentation. Special attention was given to space utilization, circulation, natural lighting, ventilation, and compliance with local construction requirements.

RESIDENTIAL PROJECT(G+1)

Floor plans

This project involves the planning and drafting of a G+1 residential building designed to provide functional, comfortable, and efficient living spaces. The layout includes well-organized bedrooms, drawing rooms, kitchen-dining areas, puja rooms, toilets, balconies, and a centrally located staircase for easy circulation. The design focuses on space optimization, natural ventilation, daylight access, and practical room arrangements suitable for a modern family residence.

MOOD board

EXTERIOR

Visualization

A contemporary two-story residence featuring exposed brick, expansive glazing, and minimalist architectural forms. Modeled in SketchUp and rendered in Lumion with a focus on realistic materials, lighting, and landscape integration.

EXTERIOR

Visualization

A contemporary two-story residence featuring exposed brick, expansive glazing, and minimalist architectural forms. Modeled in SketchUp and rendered in Lumion with a focus on realistic materials, lighting, and landscape integration.

INTERIOR

Visualization

The project focuses on achieving a balance between functionality and visual appeal through realistic materials, mood lighting, and attention to detail. Developed in SketchUp and rendered in Lumion, the visualization highlights the importance of lighting, texture, and composition in interior design.

STAIRCASE DESIGN

Curved Staircase Concept

A sculptural curved staircase designed and modeled in SketchUp, emphasizing smooth circulation, geometric precision, and elegant railing integration.

Split-Flight Staircase Concept

A modern split-flight staircase featuring intermediate landings and clean railing details, developed to explore functional circulation and architectural form.

FACADE CONCEPT DESIGN

SketchUp

A minimalist residential design study inspired by contemporary architecture. This project focuses on architectural massing, facade articulation, and spatial composition through detailed 3D modeling in SketchUp.

INTERIOR CONCEPT DESIGN

Luxury Living Room

A modern living room designed in SketchUp, featuring marble accents, warm tones, custom ceiling details, and contemporary furnishings. This project explores interior styling, material selection, and spatial composition to create a refined living experience.
